The **Blue Spotted Rays** share a passion for ethical relations with the land and sea. The group formed on a boat in the aftermath of a dive on the central Great Barrier Reef during which they witnessed both the beauty of the reef and the distressing effects of mass coral bleaching. *The Reef Song* was intended as a message to then Prime Minister, Malcolm Turnbull, about the importance of keeping Galilee Basin coal in the ground. *Rock the Boat* continues the work of bringing together creative inspiration and scientific insight to make informed and upbeat socio-environmental commentary.
